## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 09/15/08 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 3 is rejected under 35 U.S.C. 102(e) as being anticipated by Persson (US 6,144,653).

Regarding claim 3, Persson teaches receiving signals over the second air interface from the second base station (i.e., mobile determines DCC acceptable for camping on a cell selection, col. 45, line 64 to col. 46, line 55); evaluating a characteristic of the signals (col. 46, lines 5-27); responsive to the characteristic,

selecting the second base station in place of the first base station (col. 46, lines 41-53); camping on a cell associated with the second base station, wherein evaluating the characteristic comprises applying a CDMA path loss criterion to the signals (col. 47, line 24 to col. 48, line 55).

***Allowable Subject Matter***

4. Claims 7-8, 20-22, 28, 52-54, and 60 are allowed.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
